MEMORANDUM FOR: Members, Technology Working Group

FROM: Dr. Ruth M. Davis, DCI's Computer Security Project Director

SUBJECT: Initial Meeting of COMPUSEC Technology Working Group--26 June

1. In April 1983 a DCI-sponsored Computer Security (COMPUSEC) project was initiated at the Intelligence Community Staff to focus senior management attention on improving Community capabilities and practices in the area of computer security. Over the past year this project has examined and assessed IC COMPUSEC vulnerabilities, practices, responsibilities and technology needs. Through the cooperative efforts of members within the Intelligence Community, a set of minimum security safeguards has been defined, against which key Community ADP systems have been assessed. As a consequence of these COMPUSEC assessments, operational deficiencies that need to be corrected by technology have been identified.

2. Under the chairmanship of Dr. Willis Ware a Technology Working Group has been formed whose charter is to address the application of computer security technologies against operational deficiencies within the Community. A draft charter of the Technology Working Group is attached. Although in earlier conversation with you this working group was mentioned, Dr. Ware and I would like, at this time, to formally request your participation in the Technology Working Group.

2. The Technology Working Group will meet for the first time on Tuesday, 26 June 1984, at [redacted] NW, Washington, D. C., between 0900 through 1700. A series of briefings and discussions are planned to introduce the members to the goals and accomplishments of the COMPUSEC project and to specifically discuss how the Technology Working Group can contribute to the project's overall objectives. Since the briefings will be classified, we ask that all participants pass their SI/TK clearances to the IC Staff prior to 22 June 1984. Clearances should be sent to CIA's Special Security Center\* with instructions to pass the clearances on to the IC Staff, Attention [redacted]

[redacted] will be the management liaison to the Technology Working Group, and all questions and responses regarding this meeting should be made to her at [redacted]. I further request that you inform Ms. [redacted] whether you will be attending the meeting no later than 21 June 1984. Dr. Ware and I appreciate your participation in this forum, which we are certain will make substantive contributions to the ongoing Community COMPUSEC effort.

Dr. Ruth M. Davis  
DCI's COMPUSEC Project Director
